SKILLS

java	python
Html	Css
Javascript	Bootstrap
Sql	React js
Node js	Express js
Sass	Responsive Design

PERSONAL PROJECTS

Sketch Pen Code Editor (07/2023 - 08/2023) ↗

- The Sketch Pen project is an experimental playground for Code Mirror, a versatile JavaScript text editor. It highlights Code Mirror's integration, offering users a rich, customizable coding experience with features like syntax highlighting and autocompletion. The project serves as an interactive environment for developers to explore Code Mirror's capabilities in a web-based setting.

Portfolio Website (10/2023 - 12/2023) ↗

- A React.js and Bootstrap-powered portfolio website showcases professional achievements with dynamic, responsive design. React.js ensures seamless interactivity, and Bootstrap enhances visual appeal and cross-device compatibility, creating a modern, engaging, and memorable impression on visitors.

Snap Notes ↗

- The objective of this project is to create a straightforward web application for creating and managing notes. The focus is solely on the frontend part of the application, allowing users to interact with a user-friendly interface for note-taking.
